Marketing Prompt Playbook

Event Promotion and Funnel Optimization

A practical SOP and tutorial for using reusable AI prompts to research promotion channels, generate event posting details, evaluate funnel quality, and keep campaign execution consistent.

SCOPE**3 prompt files****WORKFLOW****Copy → Paste → Improve****OUTCOME****Faster, cleaner campaigns**

OVERVIEW

How to use this playbook

This document supplies a repeatable process for event promotion and funnel optimization. Use it when you need fast, consistent, high-quality outputs from any AI tool.

USE THIS DOC WHEN YOU WANT TO

- Research where to promote an event
- Generate business event posts quickly
- Evaluate and improve your online business funnel quality
- Maintain consistency across campaigns

Prompt files covered

- EVENT_POST_PROMPT.md
- EVENT_POSTING_RESEARCH_PROMPT.md
- FUNNEL_RUBRIC_PROMPT.md

Quick Start: 5 Minutes

01	Open your AI tool, such as Claude, ChatGPT, or Gemini.
02	Copy the full text from the prompt of your choice and paste it into the AI.
03	Ask the AI to modify the prompt to your liking.
04	Once happy with modifications, ask the AI to run your prompt.

SOP: End-to-End Prompt Usage

01 Research Distribution Channels

OBJECTIVE

Build a high-quality posting list before writing copy.

Action	Expected Output
• Open EVENT_POSTING_RESEARCH_PROMPT.md. • Copy the full file contents. • Paste into your AI tool. • Run and save output as research reference.	• Platform list with direct submission links • Free/paid visibility • Submission requirements • Usefulness score and rationale • Recommended posting strategy
DEFINITION OF DONE You have at least 15 to 30 viable platforms, grouped by geography or category, with links you can use immediately.	

02 Generate Event Listing Text

OBJECTIVE

Produce ready-to-post copy in short and long forms.

Action	Expected Output
• Open EVENT_POST_PROMPT.md. • Copy the full file contents. • Replace placeholders with real event details. • Paste into your AI tool and run.	• Catchy headline • Distinct first-line hook • Modern, non-generic event description • Under-500-character version • 150 to 250-word version
DEFINITION OF DONE You have at least 2 clean versions you can post across multiple event channels.	

03 Evaluate Funnel Quality

OBJECTIVE Identify conversion weaknesses before spending on promotion.	
Action	Expected Output
• Open FUNNEL_RUBRIC_PROMPT.md. • Copy the full file contents. • Include your landing page copy or relevant page sections. • Ask the AI to score and list the top 5 highest-impact fixes first.	• Rubric score by section • Weaknesses by severity • Specific recommendations for hook, offer, CTA, trust, and follow-up
DEFINITION OF DONE You have a prioritized fix list and a baseline rubric score.	

04 Implement and Re-Score

OBJECTIVE Improve the funnel with evidence-based revisions.	
Action	Expected Output
• Apply top fixes from Step 3. • Run FUNNEL_RUBRIC_PROMPT again. • Compare score delta and note changes in conversion readiness.	• Updated funnel copy or page sections • New rubric score • Delta from the prior score • Notes on what improved
DEFINITION OF DONE Score increases and key weak sections move from Not Evident or Approaching toward Competent.	

TUTORIAL

Quality Control Checklist

- Links are valid and current
- Copied text is not generic

Where to Get Prompt Text

Do not use this SOP file as the prompt source. Always copy directly from the source prompt files:

- EVENT_POST_PROMPT.md
- EVENT_POSTING_RESEARCH_PROMPT.md
- FUNNEL_RUBRIC_PROMPT.md

Copy-Paste Workflow

1. Open the prompt file you want to run.
2. Select all text in that file.
3. Paste into your AI tool.
4. Add any event details or page context needed.
5. Ask the AI to run the prompt

PERFORMANCE SYSTEM

Why this system speeds production by 60%+

Using these prompts as a fixed operating system has improved creation and evaluation speed by over 60%. The value comes from separating research, copywriting, scoring, and iteration into clear stages.

MAIN REASONS

- Prompt reuse removes blank-page time
- Research, copy, and evaluation are separated into clear stages
- Rubric scoring prevents random edits and keeps revisions targeted
- Re-scoring creates fast feedback loops and better iteration discipline

Operating Cadence

Weekly	Refresh distribution-channel research.
Per event	Generate and adapt copy for top channels.
Per page update	Run rubric, revise, and re-score.
Monthly	Review lead quality, conversion rates, and rubric trendline.

Tracking Metrics

- Time to first publish
- Time from draft to approved post
- Number of channels posted per event

SIMPLE RULE

Run the system the same way every time: research first, write second, score third, improve fourth.

Congrats!

You've taken an important first step toward improving your business operations. You can breathe easier knowing you now have a clearer path forward.
